Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 10-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Iwao (US 6593844).

Iwao discloses in **figures 6b and 18b**, a lamination-type resistance element comprising a laminated sinter having a plurality of ceramic resistance layers (**11**) and a plurality of internal electrodes (**15, 16**); a first external electrode (**13a**) and a second external electrode (**13b**). Note that figures 6b and 18b show the same internal electrode (formed in pairs) arrangement as that of **figure 7** of the instant application.

Regarding claim 17, Iwao discloses the gaps located at different positions when seen from the lamination direction of the laminated sinter.

3. Claims 10-16 and 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Feichtinger (WO 03/049126 or US 7135955)

Feichtinger shows in **figure 6**, different combination of internal electrodes, wherein a first group includes internal electrodes facing each other with a gap therebetween on the same plane inside the laminated sinter and connects with the external electrodes.

Figure 6C shows the gaps lying on top of one another and no connection electrodes (26).

Figure 6B shows one internal electrode connected to the first external electrode, and a second internal electrode connected to the second external electrode and a ceramic layer in between them.

Regarding claim 19, please refer to **figure 4A**.
